

Please follow these steps to start the program

Type these commands on terminal in sequence after you have entered the "rollno." folder.

cd finder

./finder

A window will appear , please maximise it. Then ,

Use these rules for further proceeding :

now we have two button : "prefix search" -button and "keyword search" -button

"prefix search" - provides the autocompletion feature

"keyword search" - provides files with exact same name

choice 1 : "prefix search" button clicked

--> type the file name you want to search, please start the name with an alphabet , as you type the name of the file the list changes accordingly.

--> only 10 entries are shown at a time, to view more press "Next" -button, if you want to view the previous files, then press the "back"-button.

--> to open a file or folder among the listed, click on the corresponding button.

choice 2 : "keyword search" button clicked

--> a new search button will appear

--> type in the full keyword of the file and click the search button and the file-list will appear

--> rest all steps are same as in 'choice 1'

click the quit button to exit the program
